Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Friday 20 Aug 2021

UK Outlook for Saturday 4 Sep 2021 to Saturday 18 Sep 2021:
Confidence decreasing into this period, however there is a signal for high pressure and associated settled conditions to gradually become less dominant, with a trend towards more unsettled conditions. This may bring changeable conditions with periods of showers and longer spells of rain, interspersed with drier spells at times. Temperatures are likely to be above average for the time of the year.
